Plans to increase capacity on the routes to Stratford and Beckton

Docklands Light Railway (DLR) is planning to enhance the capacity of the routes from Poplar to Stratford and Beckton by introducing longer (3-car) trains.

The scheme will include:

- Extending platforms and some canopies at 11 stations;
- Strengthening some viaducts and bridges on the routes to take the weight of longer trains; and
- Making improvements to a major junction at the centre of the DLR network (the 'Delta Junction')

A series of local public consultation events are planned to allow people to find out more about the scheme and put questions, comments or suggestions to the project team
